

REPORT OF U.F.A. & U.F.W.A. LOCAL ANNUAL CONVENTION

The 1926 Convention of the Wainwright U.F.A. & U.F.W.A. Constituency Association which was held in Wainwright on Thursday June 10th, was one of intense interest and enthusiasm.

Commencing at 10 a.m. the very splendid program arranged by the board of directors was carried out in a most interesting manner. The Convention was called to order with the singing of "O Canada" followed by the address of welcome from Mr. E. L. Cork Mayor of Wainwright, who in a most gracious and kindly manner gave the address of welcome on behalf of the Council and the citizens of Wainwright.

Mr. Herbert Spencer, who was also elected chairman of the convention by an unanimous vote in a very able manner presented the President's report, reviewing in some detail the progress of the association since 1921.

The Secretary-treasurer, Mr. Fred Fork, then gave a carefully prepared report of the U.F.A. & U.F.W.A. locals in the Wainwright Constituency. This report showed an increased interest and activity in many localities since 1921. Including directors who were not registered as delegates there were some fifty-five delegates present.

The three committees—"Credentia", "Order of Business", and "Resolution" were then appointed each of which functioned in a very capable way during the convention.

During the afternoon Mr. W. T. Hays, delighted the convention with several much appreciated songs. He was ably accompanied by Mrs. Robert S. Broad of Edmonton.

Several resolutions were presented to the convention for consideration and adoption of which the following three might be mentioned:

1. Resolved that this association urge upon the Provincial Government the early completion of the main highway through Wainwright to the Saskatchewan boundary and that this Association co-operate with the Board of Trade in the Wainwright Constituency in an effort to make this highway part of a Main Trans-Canada Highway.

2. Resolved that since the young people are essential to the permanent success of the U.F.A. & U.F.W.A. organization that the Wainwright U.F.A. & U.F.W.A. Association appoint a supervisor for young people's work.

3. Whereas the present Municipal Act requires the Auditor to send notices to at least fifteen per cent of the rate-payers who are in arrears of taxes.

Therefore be it resolved that this convention go on record favoring the auditor sending notices to all the rate-payers who are in arrears.

Following the regular business nominations for the U.F.A. candidate for the Wainwright Constituency received two names came before the convention. Mr. J. R. Love and Mr. J. G. Clarke. After short addresses by the nominees a vote was taken and the present member, Mr. J. Russell Love, was elected the candidate.

Upon motion of Mr. J. G. Clarke, Mr. Love was made the unanimous choice of the convention. Enthusiastic applause greeted this motion which showed that the convention was wholeheartedly behind Mr. Love in the present campaign.

Mr. Love then presented a very concise and comprehensive report of the present administration since 1921. Dealing with the U.F.A. platform in detail, Mr. Love showed how the present U.F.A. Government had carried through its pledges made to the people of Alberta in 1921.

Mr. Norman Clarke chairman of the Alberta Dairy Pool gave a splendid report on the work of the pool since its inception a year ago. Mr. Clarke considered a number of vexatious questions asked by those interested to the satisfaction of all concerned. The information on the weed problem and its effect on flax in streambeds explained why this year all over Alberta it is difficult to avoid getting a great amount of number two cream if cows are permitted to have access to weeds of various kinds. This address added much to the interest of the convention.

In the evening the splendid and most interesting convention was reached by Premier Brownlee and Mrs. Brownlee. Mr. Brownlee, President of the U.F.W.A., spoke to some six hundred people at the Elite Theatre. A fine musical program preceded the addresses of the evening when Mrs. Robert Broad of Edmonton and Mr. W. T. Hays of Edmonton delighted the audience with their solos.

Mrs. Roy White of Irma was a very able helper. Mrs. Gunn in her usual charming manner gave an address which will long be remembered by those present. She presented the challenge of high ideals to the Wainwright of Alberta urging the members of the U.F.A. and U.F.W.A. to follow the practical idealism of the Prince of Peace which shows itself in true co-operation and service.

Mr. Russell Love, U.F.A. Candidate who introduced the Hon. John E. Brownlee Premier of Alberta testified to the great respect in which Mr. Brownlee was held by his colleagues. Mr. Love referred to the long years of service Mr. Brownlee had given as legal advisor to the Farmer Commercial Organizations of Western Canada and to the fifteen years which he had been associated with the U.F.A. which service so ably fitted him to be a leader in the U.F.A. Political Movement.

Mr. Brownlee then gave a masterful and detailed account of the U.F.A. Administration since 1921 which addresses will appear in next week's issue. This ended the best and most enthusiastic U.F.A. Convention ever held in Wainwright.

A TRIBUTE TO THE FARMERS OF WESTERN CANADA

The following quotation is taken from an address by Judge R. W. Bingham, Chairman of the National Council of Farmers' Co-operative Marketing Associations of America, to the Fourth National Co-operative Marketing Conference held in Washington, D. C., January 1926.

Judge Bingham remarks at the head of the Co-operative Marketing movement in the United States and his wide experience is able to judge as to the benefits of the Canadian Wheat Pool.

In his address on "The Progress and Adequacy of Co-operative Marketing" he states as follows:—

Why is it that the United States Steel Corporation gets the benefit of the tariffs on steel while the wheat growers claim that they receive no benefit from their tariff?

The difference is not in the tariff; the difference is in organization. The people interested in steel, several hundred thousands of them, are members of the Steel Corporations.

The wheat growers, several hundred thousands of them, are using their energy and talent in persuading politicians to pass laws instead of following the primary leadership of the wheat pools that have already started to work out a probable solution in states ranging from Texas to North Dakota.

If the exportable surplus is the thing that breaks the market on wheat, it is that Canada, selling more than three hundred million bushels of wheat, about three-fourths of the crop of the world market, with no tariff to help her, with no government surplus corporation to aid her with a powerful cooperative marketing association built up under the brilliant leadership of men like Brownlee and McPhail is able to give greater returns to their wheat growers of Canada than the wheat growers of our own great states like Kansas, Nebraska and Minnesota.

The Canadians are organized; only a small part of our growers has learned organization. It is not the tariff which counts; it is organization which alone can enable the farmers of this country to get the benefits of their own good wheat, either in the face of a tariff or in the absence of a tariff.

The average farmer in Kansas sold his wheat this fall and he did not take advantage of the fine marketing association that the far-visioned men of Kansas have built up for him. Less than ten per cent of Kansas wheat growers sold through the co-operative pool. Yet the Kansas wheat grower with the forty-two cents per bushel protection with a present price (January) of about \$1.75 as Chicago will receive about thirty cents a bushel less for his wheat than the Canadian farmer with a \$1.60 price at Winnipeg.

Freight rates do not make any difference in this relative statement. Climate makes no difference. World markets make no difference. The tariff makes no difference. The world seems to be waiting the other

LYMBURN ASSUMES CABINET POSITION

EDMONTON—John E. Lymburn, new attorney-general, is now entitled to the word "Honorable" following his swearing into his new portfolio by Lieut-Gov. Egbert. The ceremony took place in the office of the governor at the parliament buildings and was witnessed by Hon. Alex. Ross and Mr. George Hoadley, as well as members of the civil service.

Hon. Mr. Lymburn will enter upon his new duties at once, occupying the offices formerly held by Premier Brownlee in the west wing of the parliament block.

THOUSAND BARREL CRACKING PLANT FOR WAINWRIGHT

Wainwright appears to be well on the way to becoming a big refining and marketing centre, as well as a producing area. Already two announcements have been made regarding the construction of refining plants of the very latest type to be erected there by California, Calgary, and Pacific Coast interests. Before the end of the present year, the company is to be known as Inverloch Oil Ltd., and has already purchased 320 acres of land in the district.

Edward G. Brown, a well-known operator of Los Angeles and Vancouver and one of the principal shareholders in the concern, visited Alberta recently to make final arrangements for the new plant.

Before leaving for the south, Mr. Brown said: "It is planned by myself and my associates to install a plant that will be the last word in cracking plants. We have purchased a 320-acre site located advantageously with relation to the oil field. I have made a close study of the character of the oil produced in this field and find that it will lend itself to economical cracking into gasoline and coke, and at a less cost per barrel than California oil."

The outstanding feature of the process to be employed is the simultaneous topping, cracking and cracking of crude oils in one operation. This mode of operation can be so controlled that just two commercial products may be produced from the process—gasoline and coke—or pressure distillate, residual oil and coke, or gasoline.

It is said that this process will recover 55% gasoline from the Wainwright crude.

The new plant will have a capacity of 800 to 1,000 barrels a day and will be fed by pipe lines from producing wells. Construction will start within the next few months.

"THE MILLION DOLLAR HANDICAP" BIG SUCCESS

Flashing colors, beautiful women, hard riding jockeys, fun and thrills go hand in hand in "The Million Dollar Handicap," a new Metropolitan production which will be shown at the Elite theatre Friday and Saturday.

For the first time in screen annals the old-fashioned idea regarding a race track story has been thrown in the discard and a new idea developed and presented in a human way on the screen.

Vera Reynolds, the heroine of the production, proves herself quite an adept at riding race horses and is seen in a role which suits her to perfection. Her dash and courage are genuine and she makes her role exceptionally appealing.

Edmund Burns, Tom Wilson, Ralph Lewis, Clarence Burton and a dozen jockeys augment the work of Miss Reynolds and make the production one of unusual interest. There are many enjoyable comedy touches. It affords moments of happiness and entertainment—due to the human qualities of the story and the manner of its telling.

The one difference is made by co-operative organization. The Canadians looked over the line and saw what was being done by co-operation in America. They had courage enough and vision enough to see the advantage in the fine marketing association that the far-visioned men of Kansas have built up for him. Less than ten per cent of Kansas wheat growers sold through the co-operative pool. Yet the Kansas wheat grower with the forty-two cents per bushel protection with a present price (January) of about \$1.75 as Chicago will receive about thirty cents a bushel less for his wheat than the Canadian farmer with a \$1.60 price at Winnipeg.

Freight rates do not make any difference in this relative statement. Climate makes no difference. World markets make no difference. The tariff makes no difference. The world seems to be waiting the other

CONSERVATIVE LEADER SPEAKS IN BEHALF OF LOCAL CANDIDATE

A stirring appeal was made to the people of Wainwright and District by Mr. A. A. McGillivray on behalf of Mr. George Hudson, the conservative contestant for this district, on Friday afternoon of last week. Even in view of the fact that a steady downpour of rain had been existing all day a very representative assemblage was present in the Elite Theatre to hear both the local nominee and the party leader.

Consistent argument on the large questions of the day pertaining to Provincial matters, was put forward in an interesting and well-informed manner. Particular reference was made to the present administration's promise of redistribution and the speaker inquired if the public were of the opinion that it could not be carried out in a five year term was there any surety that it could by the same party in ten years.

Alberta's Northern Railway problem brought forth the charge of "Indecisiveness" an unwarranted expenditure in the face of contrary local opinion.

In dealing with the natural resources problem Mr. McGillivray announced that Ottawa played with "infantile people" sent there to represent this province. The speaker wanted to know if he has indicated every citizen had a right to know: "Why Premier Greenfield was deposed" and stated that this question had been asked by him on more than a hundred occasions without having had a reply.

The party leader also announced, in connection with the school question that none but the ignorant could fail to know that no discrimination could be admitted as per section 17 Alberta Act and that Premier Brownlee was now trying to regulate an agreement and that a "blundering and inefficient government had donated a school question where none existed before."

Mr. McGillivray offered, if his party is successful on June 28th, to repeal the legislation and give confidence to capital that they may feel safe in investment in this magnificent, opportune province. The relation of labor to politics was covered to the extent that Mr. McGillivray stated "I stand foursquare for the Labor Union's and assured the assemblage many of whom were Union men that they would find representation through their local Conservative representative."

MONEY IS NOW NEEDED FOR THE EX-SOLDIERS

For the last six years the Tuberculous Veterans' Association has been carrying on its work in behalf of service men of Canada suffering from this disease, and there are yet a large number of cases to be adjusted.

A Dominion-wide appeal has been made for funds to carry on this adjustment work and cities throughout Canada have already made a good start in subscribing the full amount allotted to them. The total objective has been set at \$5,000. The sum is required to take care of the work until such time as the Canadian Legion is in a position to take up the burden.

The work of the Tuberculous Veterans' Association, which is now asked in the public for assistance to tide over a critical period in its struggling career, is that of prolonging the lives of ex-soldiers.

Many of the 500 cases now awaiting financial help will get pensions if it can be shown at Ottawa that they are afflicted as a result of war service. If they were dropped and their claims not continually pressed, they would probably never get any assistance.

WAINWRIGHT CRUDE OIL PROVES TO BE EXCELLENT FUEL

The Edmonton Gas and Development Co., who are drilling for Western Consolidated are now using crude oil for fuel and Driller Hugh Campbell says it is giving entire satisfaction.

Following this successful test, no doubt the whole Wainwright field will be using the crude fluid for fuel before long.

OIL SANDS REACHED AT EMERALD WELL

The big rotary drill at the Emerald well has now reached the oil sands according to Driller Frank Stevens and the crew are only awaiting the arrival of some casing before punching the hole through into the big reservoir when they will be able to ascertain to what extent their labors have been rewarded.

TITLED CONVERT TO CANADIAN PRAIRIES

WINNIPEG—"I simply love Canada and the life here in the west, and am now on my way home, to come back early in September, when I hope to bring my mother with me," was the emphatic sentence in which Lord Edward Montagu, younger son of the Duke of Manchester, summed up his general impressions of his year's stay in Alberta.

Lord Edward, who has been a student of applied farming on Lord Rosne's farm at Fort Saskatchewan, reached Winnipeg from Edmonton and is spending the day here. He will travel east on the Toronto express and hopes to take passage on the S.S. Melita from Montreal.

SENATE THROWS OUT OLD AGE PENSIONS BILL

OTTAWA—The senate threw out the Old Age Pension bill by a vote of 40 to 21.

The defeat of the bill came on second reading which had been moved by Senator Dandurand, government leader. In the vote Senator Robertson, former minister of labor, was the only Conservative to support the bill. Sir Allen Aylesworth Senator J. J. Hughes and Senator Turfitt, all from the government side of the house, voted with Conservatives against the bill.

CHILDREN OF SCHOOL AGE MUST REGISTER FALL TERM

The regular meeting of the School Board was held in the school on June 7th when all members were present.

Prosser-Boyd—That minutes of last regular meeting be adopted as read. Carried.

Boyd-Prosser—That Secretary be advised to acknowledge receipt of Departmental examination papers—Carried.

The Finance committee reported the following bills amounting to \$130,373 with recommendation that same be paid.

Teacher's Salaries	\$108,000
J. Williams, Salary	100.00
Sc-Treas. Salary	10.00
Imperial Oil Co.	40.38
Wainwright Pharmacy	11.50
Atlas Lumber Co.	1.75
Wainwright Machine Shop	1.25
Sheet Metal Works	2.50
Imperial Lumber Co.	20.40
Boiler Inspector	7.77
Chimney Sweep	7.50
H.S. Literary Assoc.	5.00
Mrs. C. Horne	1.20
Telephones	3.25
Utilities (light)	4.00

Boardman-Prosser—That Finance committee's report be adopted—Carried.

Prosser-Boydman—That the report of Principal Hollinshead for the month of May and the report of Miss M. Kain for grade 1 be accepted and filed—Carried.

Boydman-Middlemass—That attendance officer's report be accepted and filed, and one copy sent to the Dept.—Carried.

Boydman-Middlemass—That a notice be published in the Wainwright Star, asking all parents of children reaching the age of six (6) years during the coming December, and therefore eligible for entrance to school at the opening of the "Fall" term, to notify Principal Hollinshead or See Treas. Steel before the close of the present month of June—Carried.

As this concluded the business the meeting was then adjourned.

WAINWRIGHT CRUDE OIL PROVES TO BE EXCELLENT FUEL

WAINWRIGHT CRUDE OIL MAKING GOOD AS FUEL

J. R. LOVE'S REPORT OF STEWARDSHIP TO CONVENTION

Mr. J. Russell Love, the present member for Wainwright, presented an accurate and comprehensive report of his stewardship during the past five years. Mr. Love dealt in detail with the U.F.A. Platform for 1921 showing to the complete satisfaction of the convention that the present administration had more than kept its pledges made to the people of Alberta.

Mr. Love considered the U.F.A. Platform plank by plank showing that the principle of proportional representation and the preferential ballot in single member constituencies had been put into legislation in the present election. Mr. Love emphasized the necessity of votes marking their ballots with one not with an X if they wished their vote to count in the coming election.

J. RUSSELL LOVE, M.L.A.

Who is again seeking Re-election in the U.F.A. interests in the forthcoming elections.

The U.F.A. Platform of 1921 stood for the complete abolition of the patronage system in the conduct of all provincial business. The carrying out of this plank has resulted in a greater efficiency and economy in all departments of the government. Mr. Love showed conclusively how the abolition of the patronage system had caused the public service to be placed on a fair and square basis.

The establishment of a Highway Commission whose function it was to supervise and control all Provincial Road Work and expenditures for that purpose had supplanted entirely the old method of party control and patronage. The work of the Highway Commission had been very satisfactory. Mr. Love declared Mr. Love, every Constituency receiving its fair share of road money on a system which took into consideration the mileage, cost population etc. A minister's riding an opposition riding and a government member riding all get their grants on the same basis. This Highway Policy is one of the most important achievements of the present government.

Mr. Love dealt at length with the plank which called for the administration of the affairs of the province with the greatest measure of economy that is consistent with efficiency. The balance of the budget would be a very simple matter declared Mr. Love, if the government has no regard to the continued efficiency of the public services, but it is an entirely different matter to balance the budget without impairing public services.

Dealing with the financial criticisms levelled at the present administration Mr. Love showed that the government had a record of economy unequalled by any other province in Canada during the past five years. Critics who compare Alberta with Saskatchewan do not consider that Saskatchewan has "no provincial railways which make such a tremendous drag on the public funds of Alberta."

Controllable expenditures which include all expenditures on public services except interest on public debt, increased in Alberta from 1917 to 1921 at the enormous rate of one million dollars per year. The U.F.A. government since taking office has reduced these expenditures by \$1,179,394.57—a reduction of 14%. There are only two other provinces in Canada which have reduced controllable expenditures since 1921 Saskatchewan with a 12% reduction and Manitoba with a 85% reduction.

Dealing with the increase in Public Debt of twenty-two million dollars Mr. Love showed how unreasonable it was for Mr. McGillivray to compare a private debt with a public debt. A private individual buys a car on credit.

Referring to Education Mr. Love quoted the following figures to show the progress made in this department. There was a marked improvement in the number of qualified teachers by the fact that in 1921 there were 729 permit teachers, while last year there were only 65. In 1921 the number of rural schools holding grade eight examinations was 899, while this year 1725 schools had already applied for grade eight examinations. Although the number of inspectors had been reduced there were more and better inspection of school to-day than in 1921. In order to reduce the cost of education the government had arranged to have test books sold at cost thus saving from 15 to 20% for the purchase. Special grants were now given to weak school districts so that every boy and girl in Alberta will now have at least six months schooling per year.

Mr. Love showed the progress that had been made by the Department of Health since 1921. The travelling clinic which includes a fully qualified doctor, dentist and a nurse have visited many outlying districts bringing medical attention to many who otherwise would not have received it. 12,000 children under school age had received medical attention from these public clinics. The government had made much progress in public health and child welfare work. The scope of the Mother's Allowance Act and the Workmen's Compensation Act have been increased so that Alberta ranks among the leading provinces of Canada in social legislation. Mr. Love's report which was very extensive and complete received the hearty applause of the convention.

He expects naturally to pay of his debt during the life time of his car. The province builds a public institution for a million dollars whose life-time may be 300 years. Why should the people of to-day be expected to pay for that institution which will serve the people for the next three hundred years asked Mr. Love. In this new province we are called upon to build permanent improvements in the shape of public institutions, telephones, highways, public buildings etc. to serve the people of this province for several generations. Mr. McGillivray's claim is that we should pay our way as we go and not borrow on the credit of the province. Such a policy would be contrary to the practice in every country in the world. However, the U.F.A. has put the brakes on in regard to increasing the public debt. In 1921 the government that year borrowed \$16,704,934. Last year the U.F.A. government got along with only increasing our provincial debt two and a half million dollars. Mr. Love went into detail to show that the increase in public debt during the past five years has been to a great extent entered into commitments and contracts entered into before the U.F.A. government took office.

Referring to Education Mr. Love quoted the following figures to show the progress made in this department. There was a marked improvement in the number of qualified teachers by the fact that in 1921 there were 729 permit teachers, while last year there were only 65. The travelling clinic which includes a fully qualified doctor, dentist and a nurse have visited many outlying districts bringing medical attention to many who otherwise would not have received it. 12,000 children under school age had received medical attention from these public clinics. The government had made much progress in public health and child welfare work. The scope of the Mother's Allowance Act and the Workmen's Compensation Act have been increased so that Alberta ranks among the leading provinces of Canada in social legislation. Mr. Love's report which was very extensive and complete received the hearty applause of the convention.

Mr. Love showed the progress that had been made by the Department of Health since 1921. The travelling clinic which includes a fully qualified doctor, dentist and a nurse have visited many outlying districts bringing medical attention to many who otherwise would not have received it. 12,000 children under school age had received medical attention from these public clinics. The government had made much progress in public health and child welfare work

"Satan in Sables" with Lowell Sherman is a picturization of this novel.

(Continued from last week)

It was intolerable! Rebellious at the injustice of it she determined to face the issue; yes if it even meant losing the most precious thing in her life—little Billy. Better that than to be branded a common thief in the eyes of the world. Why, when if Michael had reported his being made for her this very minute?

Crepine to the door leading to Emile's room, she knelt down and peered through the keyhole. Her soundlessly brother-in-law was standing by the window examining the emerald with evident satisfaction. After a moment, he wrapped it in an old handkerchief, then tucked it away in a drawer of his bureau. Carefully locking the drawer and putting the key in his pocket, he lay down upon the bed and composed himself like a well-contented alley dog.

After watching him for a few moments, Colette crept away from the door and sat down to think. How to get the stone away from him was the problem! He would undoubtedly go to sleep now. Late in the evening he would sneak out, and through some underground channels known only to those of his class, would seek a fence—buyer of questionable goods. There in some out of the way dive in the underworld, Emile would receive money, probably not a tenth of what the jewel was worth. Then, indeed, Colette would stand branded as a thief before the world.

Billy interrupted her thoughts. "I slept some more, Auntie—I slept some more! And now you said that I could have my bon lions," he cried, and then you promised to take me in the park to watch the funny birds with the long necks, that stand on their heads in the water.

"Very well, Billy; here are the candies I promised you—though perhaps you'd rather not eat them, but save them for your friends, the Bois de Boulogne swans."

"But can't we take them some bread instead?" Billy asked so anxiously that Colette laughed and reassured him.

"True! But the bon lions yourself and I will get a bag for the bread." Looking through the keyhole once more, Colette saw that Emile was fast asleep. She inwardly prayed that he would remain so—and that some means might be given her to get into his room and secure the emerald before he removed it.

Then she took Billy and departed. "What a glorious afternoon!" Colette exclaimed as they were walking along. "See, the grass is freshly green and the buds are starting. Soon everything will be mellow and blooming and then what fun we'll have with picnics and visits to the country, and who knows what else?"

"The real country, where the cows live," Billy asked, his little face all aglow at such a prospect.

"The really, truly country where the cows live!" Colette laughingly assured him. "One day, Billy boy, if my dreams come true and my air-castles are not tumbled to the ground, we will live there all the time. Then we will be awakened in the morning by the birds and lulled to sleep at night by the wind in the trees."

"Billy's pond," as he proudly termed it, was duly reached and great was his enjoyment as the swans were fed. This turned out to be a red letter afternoon in his life because for the first time, his favorite swan, a particularly large one, had actually come right up and taken a piece of bread out of his tiny fingers. It was an ordeal that required herculean courage, but Billy rose to the occasion like a man even though for a moment he was in doubt as to whether to take to his heels or depend upon the protection of his Aunt's presence at his elbow.

"Bravo, Billy! See, Mr. Swan is coming back for more!" cried Colette. While Billy continued to feed the swan, she was instinctively told Colette she was being watched made her turn to find herself face to face with Ninon and Freddy Erskin.

With a confused little bow, Colette would have moved away but Freddy was not to be denied. "Why, it's Columbine!" he exclaimed in pleased surprise. "I don't think I shall ever forget that wonderful dance we had together, little one. Every bone in my body aches right now—with the kind of ache that wants for more!"

"We all enjoyed your dancing Mademoiselle," Ninon said with a grudging smile. "I hope you've recovered from your little spell of indisposition."

"Completely, thank you—and, oh! my good friends, a thousand pardons that I made such a scene!" Freddy held up a lightly deprecating hand; as for Ninon, her attention had switched to Billy.

"What a pretty little boy! Is—he is yours?" she purred, in the manner of a cat gingerly picking its way across a shell-full of hot coals. "I don't think I shall ever forget that wonderful dance we had together, little one. Every bone in my body aches right now—with the kind of ache that wants for more!"

"Oh!" said Ninon. "Plucky little beggar!" enthused Freddy, admiringly.

"I don't know what I should do without him," Colette went on simply for he is all of my happiness—my life. Ninon appraised Colette covertly, recalling Michael's theories about the pert "Columbine," and wondering whether that all-wise man-of-the-world had read aright the social situation of the little dance. Ninon in that moment had a vivid mental glimpse of Colette's struggle in life—her fight against odds. Life to any girl without means in Paris was a bitter fight; and for one to bring up an orphaned child in addition was a voluntary addition to the load—a gesture of self-sacrifice—that Ninon could not understand, but could appreciate. Suddenly Ninon felt her own shallowness filled with warm flood for admiration for the brave and big soul in the slender little girl that stood before her.

And when Ninon bade Colette good-bye a moment later—after patting Billy's apple-cheek and placing in his little fist a glistening two-franc piece that Freddy had impulsively dug out of his pocket—there was a genuine ring of cordiality, and sincerity in the words and smile of the fashionable girl that touched Colette. It seemed to the shabby little girl that Ninon with feathers and poise as queenly as the stately swans upon the lake—and who, doubtless, for the mere asking, had everything that women desire in the world—sympathized with her, and appreciated the grim battle that she had to put up for what little she at-

Sundown had purpled the Bois before Colette and Billy left for home; when they arrived at their humble door, pitch darkness was making its usual nightly mockery of the meagre and impotent street lamps of Paris poorer sections.

Colette's heart pounded to find that Emile was still sleeping—sounder, more abandoned, than before. Trembling but resolute and eager in her determination, Colette lost no time in giving Billy his bowl of bread and milk and bundling him off to bed with a tender injunction to dream of the swans and the rows and the green fields, where some day they—Billy and Auntie—would live.

Then Colette alone was left awake in the barren little flat, to work out the desperate destiny of her unwelcome connection with the innocently acquired Yveredoff emerald.

To gain possession of the jewel, which was now locked in Emile's bureau, was Colette's sole thought. After vainly racking her brain, the hopelessness of getting the emerald without rousing him and invoking the punishment of his brute force upon her helpless head, forced itself on her. She decided that the best and only thing to do was to wait until he went out with the gem in his possession. She would follow, and then if her appeals were of no avail, she would summon a gendarme of the aftermath that she dreaded.

Sitting there in the semi-darkness of poor gaslight, she prayed that this course of final resort would not be necessary, for she knew that Emile would wreak his vengeance on her through little Billy—knew, too, that her life henceforth would be a veritable hell.

Was her prayer to be answered, she wondered, when a sudden knock came at the door that opened directly to Emile's room from the outside hall-way landing.

She crept silently to his inner door and heard him answer sleepily. It was an Apache friend, enjoining him to come to the corner immediately as one, Decline, was awaiting him there. Emile jumped out of bed with an oath. A few seconds later, Colette saw him go out on the hallway landing without raking the emerald—heard him go downstairs with his companion and out.

Colette's path was now clear! Rushing into Emile's room she tugged at the locked drawer, but without avail. Frantically, she procured a hammer and forced the drawer open. She breathed a sigh of relief when the emerald was once again in her hands.

Hastily, she went out—pausing on her way downstairs to ask the woman below to look after Billy.

Gaining the street level hallway at last, Colette opened the front door cautiously—holding her breath, clutching the emerald to her, bumping breast until she made sure that Emile and his fellow Apaches were nowhere in sight. Then she quickly ran out into the street and was swallowed by the blackness of the Paris night.

CHAPTER FOUR

Meanwhile, that "morning after" had not begun auspiciously for Michael. Upon awakening he asked, "What time is it, Sergius?"

"Eleven o'clock, Monsieur," the servant replied in his precise fashion as he commenced to lay out his master's clothes.

"No sooner do I lay my head on the pillow than it is time to get up again! Has my brother arisen?"

"Yes, Monsieur, he has had his breakfast and is in the library."

"Then I must hurry!"—and Michael jumped out of bed.

As he made his toilet, events of the preceding night came to him and upset his frame of mind. First, there was the serious loss of the Yveredoff emerald to upset him. The priceless jewel had been in his family for many years—now he was the unlucky one ordained to lose it. Examining his watch, he noticed that the gold ring that attached it to his fob was broken.

Why, then—if the emerald had just dropped off—hadn't it been found? Michael had given orders for the servants to search everywhere, but their efforts were unsuccessful. Much as he disliked the thought everything seemed to indicate that it had been stolen.

But by whom? Colette's admiration for the emerald and her questions about it came to him. True, he distinctly remembered that she had given it back to him after she had inspected it. Still that was the only time he had taken the watch out of his pocket.

Had "Columbine" stolen it? Her fainting, her sudden disappearance seemed to point out a bad case against the little girl. Yet, something in Michael's heart made him try to doubt the legitimate suspicions raised by his common sense.

"Was Ninon right after all? He asked himself. "Was Colette just an ordinary gamin—a thief? Well, if so, my judgment of human nature has been sadly fooled for once!" Some vagrant mental wind now connected Michael's reflections about Colette with thoughts of Dolores. He (Continued on page 5)

ATTEND LEADS

For the next few weeks the province will be a general election. In three parties entered in the contest in a large percentage of the constituencies throughout the province it is only to be expected that more than the usual number of public meetings will be held in all the centres. At these meetings the candidates and their supporters will outline their respective policies and discuss questions of interest to the general public. For this reason all should take advantage of every opportunity to attend these meetings so as to be in a better position to vote intelligently on election day.

We would especially draw the attention of the young people to these meetings and urge upon them the advisability of being present at them. They should prove educative as well as instructive to all concerned. In the Wainwright constituency the candidates are J. Russell Love, M.L.A., U.F.A., and Geo. L. Hudson, Conservative. Both are capable men who are well and favorably known. This being the case the voters will be largely influenced by the policies, parties and platforms which they represent and advocate. The only way to get the information necessary to permit one to vote intelligently is to turn out to the meetings and hear the candidates themselves.

is, of course, the danger of being too inclusive but in view of the variability of natural conditions this would seem to be a lesser evil than restriction. Until we have information as to the relative importance which is assumed by each of the factors operating in the preservation of organic matter in sediments and the degree to which biochemical change is permissible in the transformation to oil, a comprehensive survey of oil origin is impossible.

Of late years, it has come to be generally realised that oil formation is at least as normal a phase of sedimentation as that of coal, and just as coal is the product of decomposition of terrestrial vegetation so presumably oil is the result of similar decomposition of other organic materials. It is convenient to divide the subject into two parts—deposition and chemical change.

SALT

It is an interesting question as to how far the almost universal association of brines with petroleum is significant of the original depositional conditions. The composition of the brines has not been so exhaustively studied as their distribution, but characteristic differences from modern sea water are increased salinity and deficiency in sulphates.

If the brines are original and have not suffered great concentration they would indicate arid conditions, probably one of two general types—

(1) Leaching of older sediments into

irretrievable dry basins—a modern example of which is the Dead Sea.

Under such conditions, as the water became more saline the life would be greatly impoverished and increasingly difficult to deposit, on account of the higher density of the water. There is, however, the possibility of the salt as being segregated by preventing the dispersal of colloidal fatty compounds during the decomposition.

(2) Saline gulf type; gulfs with periodic or permanent shallow connections with the sea, allowing water to flow in to replace evaporation, but with little or no outflow, consequently becoming increasingly saline.

All organisms carried into such a gulf would be killed, ensuring an ample supply of organic matter, in one case continuous, in the other periodic. The supply of sediment would probably be confined to wind-blown sand and dust and to chemical precipitation. The formation of gypsiferous organic deposits may be explained in this way such conditions, however require a peculiar combination of circumstances. The balance is very easily upset, and they would hardly be expected to be of common occurrence in an intense form.

It is quite possible, however, that petroleum brines were originally normal opaline waters which have since been partially altered. When a sediment is deposited on the sea floor it is saturated with salt water; compaction and multiple circulation of the connate fluids, and meteoric fresh water tends to dilute and discharge the brine, except from deeper structures or enclosed lenses. During its movements underground the brine may suffer changes in composition and concentrations due to solution of rock constituents and reaction with them.

The high salinity may in the first place be due to electrolytic concentration of the dissolved salts of sea water in the pore spaces of the fine sediments, or to the formation of secondary hydrated minerals subsequent to deposition. The deficiency in sulphates may be a genetic association due to the reduction of sulphates to sulphides which normally recombinates bacterial decomposition of organic matter in sea water iron pyrites is a familiar result. Sulphates may also be reduced by chemical interaction with the less stable hydrocarbons of petroleum, yielding carbonates in which some brines are rich.

The almost universal association of petroleum with brine may be due not only to the fact that meteoric water, usually dissolve the salts from sediments, but that where meteoric circulation is possible oil and gas tend to be removed.

COAL AND OIL

It may be regarded as proved that coal is essentially the product of terrestrial vegetation, deposited in peat bogs and marshes or transported under marine or fresh-water conditions.

Marine animal and plant life are the only other types of organic matter which can form an important constituent of sediments and petroleum is likewise the other form of hydrocarbon occurring in sedimentary rocks; hence a close connection between the two would be surmised, and this is supported by the following generalisations—

(1) Petroleum occurs more commonly in rocks of marine origin and is intimately associated with their connate brines.

(2) It is chemically possible to obtain petroleum from most types of organic matter, and presumably under such conditions as occur geologically.

With these premises it is possible to form some idea of the depositional relationship of oil and coal, and possibly by comparison and test to learn more of both.

Although it is possible for coal and oil-forming conditions to vary laterally into one another, it is by no means essential, for the coal may be formed from upland peat bogs with no associated marine equivalent, or in land swamps when conditions offshore are unfavourable to organic accumulation. In the case of coal formed from transported materials, the currents would necessarily possess fair strength, the deposition would be rapid (as the small percentage of sediment in rates), and preservation of other life may be small. On the other hand, offshore conditions could be quite favourable for accumulating marine or fresh-water organic life associated with the leaves, spores, and remains of the terrestrial vegetation. Such conditions would also favour the development of marshes already discussed.

But such environments probably represent a small proportion of those favourable for organic accumulations, and it is evident that the majority of marine organic deposits would form without contemporaneous terrestrial plant accumulations. The association of petroleum with coal laterally or otherwise, would therefore be expected to be much more common than the converse association of coal with petroleum—which agrees well with the observed facts and supports the original contention.

NO ONE THEORY SUFFICIENT

The author, after further discussion remarks: It would appear that no common theory is sufficient to explain the origin of all petroleum deposits, but that each deposit must be judged on its own merits. Such a conclusion is inevitable when the wide possibilities of variation in sedimentary conditions are considered and, further, serves to explain the chemical diversity of various oils.

The factors which determine the ultimate composition of a crude petroleum may be classified as follows:

The nature of the parent substance, its environment and deposition.

The types of chemical reaction which transform the organic matter to petroleum hydrocarbons.

The modifications caused by contact of the petroleum with rocks and underground waters during migration. Whatever varied in opinion there exists with regard to the details of the processes involved in the generation of petroleum there can be no doubt of the

In Time of Plenty

THE farmer knows—better than anyone else—how uncertain the seasons are. Careful farming and a little foresight when crops are good will help wonderfully when a lean year comes.

Here are a few suggestions:

Keep adding high-grade animals to your live stock.

Study the best methods of crop rotation.

Select the seed best suited to your locality—successful crops can come only from clean, vigorous seed.

Make your credit good at the Bank by paying up your loans and depositing something for the rainy day.

HOW TO DRIVE ON THE DESERT

BY ERWIN GREER
(President Greer College of Auto-
motive Engineering, Chicago)

There are probably few motorists but hope to at some time or another to take a trip in their car out into the Mojave Desert and see some of the little-known but very wonderful sights that delight the traveler in this region. To those who plan a trip of this nature, here is a bit of advice that may prove exceedingly useful. The man who drives on city streets and paved boulevards is apt to be careless about his driving in the deeply rutted roads. To those not familiar with the technique of desert driving accidents often happen.

It is well to realize that it is practically impossible to turn out a desert road to pass another car and to do it with the same facility that can be done on a broad, paved highway. The accepted procedure in the desert is for one car, on seeing another approaching, to turn out and let the other pass and then turn into the road again. This is a custom that has been established through experience gained over a long period of time. It pays to be safe, no matter where you drive and particularly so out in the wastes of the Mojave Desert, where assistance is sometimes a long way off.

A photograph was recently taken of a traffic accident occurring forty miles from the nearest settlement on a sandy desert road, where one car not realizing that it was a hard job to turn out of the rutted track that formed the road, collided practically head-on with another coming from the opposite direction. Fortunately but one of the cars was damaged so that it could continue on its way.

Most motorists who get stuck in the sand in trying to pass another car could avoid it if they went at it in the right way. The average inexperienced driver tries to run around the other car in a circle, so that he is pushing a great deal of sand with the sides of his front wheels.

His car then stalls against this big shovelling job, and the surprised autoist often makes matters worse by hurrying his driving wheels in a pit made by spinning them.

Only one car should leave the road in passing another machine, and that one should leave at an easy angle with as little cram of the front wheels as possible. The driver should return to the road by backing in his own tracks. The car will then have made its own road, and a car usually may go where a car has gone before.

Always have plenty of gas and water and an extra can of oil in desert traveling. Then the worst that can happen is the breaking of springs through lack of luck in crossing the washes.

When it is considered that at some points in the desert the mid-day heat is often as high as 120 degrees in the shade, it can be seen that the driver of the luckless car had a long, hot wait.

ORANIC THEORIES OF OIL ORIGIN

(Continued from page 3)

tain general conclusions based on broad geological and chemical facts. It is useless to assert, for instance, that marine environments do not provide conditions for the preservation of organic matter, when the bulk of the world's oil supply is derived from sediments of marine origin.

The diversity of petroleum-forming conditions is demonstrated by its varied chemical nature, and association with strata of many sedimentary types, but the characteristic petroliferous properties of widespread stratigraphical horizons proves that such conditions

were often attained on a grand scale. In the formation of oil pools the concentration of oil in the mother rock is of secondary importance to the facility with which it is transferred to the porous horizons and there segregated. Owing to lack of this latter factor, the bulk of the world's petroleum remains uselessly disseminated in a small percentage of the sediments in which it was formed.

CHEMICAL CHANGE

After dealing with "Chemical Change the states—"

The main interest of any theory of oil origin hinges about the details of the chemical change of organic matter to petroleum, since it is fairly certain that most types of organic matter may participate. The chief qualifications of such a theory from a geological point of view appear to be that the reactions can occur at low temperatures, not above 150 degs. C, preferably very much lower; the completion of the reactions before complete consolidation of the sediments is desirable; the decomposition of proteins, carbohydrates, and glycerides must be accounted for, and the elimination from the oil of much of the nitrogen and phosphorus; the genetic significance, if any of paraffin-mixed and asphalt-base crude oils should be explained. There is much to be said for the opinion that the initial stages are bacterial, and after the oils have been formed, a slow yield of gas might be responsible for considerably augmenting the gas pressure.

The chief avenues of research would seem to be—

(a) Physiographical, involving scientific investigation of sediments which are forming at the present day, particularly such types as are indicated in the first part of this paper

(b) Geological, involving an enlargement of detailed knowledge of the lithology and palaeogeography of petroliferous sediments and the factors controlling the movements and behaviour of oil, gas and brine in them

(c) The chemical problems would probably be outlined from the results of (a) and (b). It is evident that a problem of this magnitude, involving specialisation in several distinct branches of science, can only be satisfactorily solved by the closest collaboration of all investigators.

The task of patiently accumulating information relating oil origin could be admirably carried out by such an institution as this, for it is only by co-operative effort that the collection of adequate evidence to substantiate any general theory could be achieved.

STRANGE IDEAS OF IMMIGRATION

The following is an extract from the Edmonton Journal of a recent date: "Believing that bears might be seen climbing amid the cross-trees of Edmonton telephone poles at any time of the day while wolves lurked in every lane to waylay the unsuspecting passer by, five immigrants arrived at this city from Germany equipped with seven rifles of an expensive and ultramodern German make, and provided with three barrels each for shot as well as bullets. Other baggage included seven cases of traps for bear, otter and divers other 'wild beasts of field and forest."

Asked by local immigration agent as to the reason for their big supply of armament the intrepid hunters replied that, fired by the hair-raising novels of Max Otto a former resident of Bruderheim, who has made a name for himself in German literary circles by his "Wilderness of Canada," they had come to see for themselves.

Some people who refuse to carry fire insurance must think that all fires start as hard as the furnace on a cold morning! But a cigarette has burnt up large forests. Be wise; see Joe Welch and let him carry YOUR risk. Phone 23-6

EUCCHARISTIC CONGRESS CHICAGO JUNE, 1926

The Greatest Event in the History of the Catholic Church in America

C. N. Rye TO OPERATE SPECIAL TRAINS FROM WESTERN CANADA

Of unusual importance to Roman Catholics is the 28th International Eucharistic Congress in Chicago, Ill. June 20th to 24th next.

The Church dignitaries are duly appreciative of the efforts made by the Canadian National Railways who have arranged to operate special trains to and from the congress, and have also made reservations for several hundred people in good hotels at a reasonable expense, and ask their people to make application promptly for the necessary sleeping car and hotel accommodation prior to arranging train service so that the proper departure time for the various centres would be ensured. Those who desire to use the regular service have the privilege of travelling on the through train which is operated during the summer season from Western Canada to Chicago.

Any agent of the Canadian National Railways will be pleased to give you further particulars and complete all arrangements.

Satan In Sables

(Continued from page two)

had been frankly disturbed by the new attitude—entirely foreign to and out of key with her usual character which Dolores had adopted when Michael confronted her with Paul in the library. The soft-spoken, pliable girl whom he had always known had changed to a subtly determined woman, flinging a challenge in his teeth. Obviously, she had determined to make Paul her devoted admirer. That in itself would probably not be difficult for a woman of her charms. Paul whom Michael had always sheltered from intimate contact with women, was at a susceptible age, when the gleam of pretty shoulders and the allurements of a beautiful face and a softly rounded figure would set his young blood on fire.

But what was Dolores' ulterior purpose? Hardly an honest interest in Paul, the mere boy! And not money for she was plentifully supplied with that. Revenge—oh, that was it. Through his beloved brother, Dolores was going to try to wreck the vengeance of her piqued heart upon the man who had grown tired of her.

'Well,' thought Michael sourly, 'he went downstairs, that is a game at which two can play!'

Paul was in the library. 'Good morning, brother,' he called affectionately as Michael entered. 'I was beginning to think that you had resolved to sleep all day!'

'Was it only imagination that made Michael think Paul was evasively over cordial; was less boyishly frank; less honestly straight-forward, than usual? Michael returned his greeting slowly, deliberately, studying the young man at the white.

'No, indeed, but I must admit that my ex-crescent strong influence over me, and I was decidedly disinclined to tear myself away from its embrace. What is our program today? A walk, luncheon and after that the Louvre?'

'I am afraid that I must change that a little,' said Paul embarrassed.

'I have a luncheon engagement, I could meet you later, however, and we could walk then.'

'And with whom is the luncheon engagement, may I ask?'

'With—er—with a lady,' Paul's face flushed with frustrated evasion.

'So! Probably the lady of last night's acquaintance?'

Michael hesitated as if to get a firm grip on his confidence; then continued slowly. 'I can only say that I would prefer to have you arrange matters so that you will be suddenly prevented from keeping that appointment!'

Paul's face clouded with surprise and resentment. 'I don't see how I can do that, nor why you should ask me to,' he said. 'Besides, I want to keep it.'

'In this particular case, Paul,' Michael said concisely, 'I must insist that you do as I request!'

'But your reasons, Michael? Why do you not wish me to meet Mademoiselle Dolores? She is a beautiful and charming person, and we got along famously.'

THE DRAYMAN

Michael's brows tilted sarcastically. 'Indeed, she is undoubtedly very charming, but to give you my reasons would entail a recital too involved and lengthy for my heavy head this morning. However, I am sure you will not make it necessary for me to change my request to an order!'

Paul sprang passionately from his chair, anger convulsing his face. 'You treat me like an infant, Michael! He cried hotly. 'Must I always be tied to somebody's apron strings? I can take care of myself. Now you have a sudden whim that you don't want me to go out with Dolores, I suppose you quarreled with her!—but why should that affect me? I assure you, sir, I am going to keep my engagement!'

Michael gripped Paul by the shoulders and sought to transfix him with a dominating will-hending look.

'It isn't often that I ask you to do something for me, Paul,' he said in a urgent voice, 'and my reasons now are good, even if I can't detail them to you. But this has gone far enough. If you go to luncheon with Dolores your stay with me ends immediately! Deliberately he went on: 'And you will never come into my house again.'

A scornful laugh splintered on the teeth of Paul's white face. 'So I am to be turned out simply because I refuse to lie to a lady to suit your wishes! Very well if you will have. Serious pack my things and send them to Aunt Sophia's hotel, I shall not bother you with my presence any longer!'

Paul turned stiffly on his heels and walked out of the room—out of the house.

Michael remained 'routed' in his tracks, staring with amazement after his brother. Paul, of all people, to act this way—to rebel! Paul, who had always clung to him, leaned on him, to quit his house in sudden defiance. Had Dolores already poisoned his young and impressionable mind?

Presently as Michael breakfasted alone, the shallowness and mockery of his life thrust itself upon him. It seemed to be built on sand, and the sand was slowly shifting—slipping away—blowing out. Of a real life, a genuine life based on friendship, he knew nothing. He doubted that he had any friends in the true sense of that word. Were they not all mere acquaintances, friends who enjoyed the banquets, the wines and the amusement of his wealth and generosity gave to them, and then pursued their own pastime ways elsewhere.

Suppose he were to lose everything he possessed? How many of his so-called friends would really come to his assistance, or even remain his friends? 'None, most likely!' was his bitter decision.

Why, then, seemed a more genuine ring to that little 'Columbine' of last night that there was to his friends—even she, who put to the test had robbed him. God were they all the same? At least she had the decency to flee after robbing him! But the others were robbing him, too, only doing it by degrees—and living off his bounties the while.

Pushing his scarcely-tasted breakfast from him, Michael rose and paced the floor in moody thought. He determined to see Dolores and force the issue with her. The irony of the situation struck him when he remembered how she had begged him in vain to talk to her last night. Now a few hours later the cards were reversed; it was vitally necessary that he talk to her.

(Continued next week)

YOU TELL 'EM WAINWRIGHT YOU'VE GOT THE OIL!

THIRD FORTNIGHTLY GOV'T CROP REPORT

Issued by the department of agriculture, Edmonton, May 29, 1926.

Seeding of all grain crops in the province is now practically completed. A small amount of oats and barley seeding remains to be done, but the end of the month will see all the crops in the ground, (except green feed) which is considerably earlier than in former years.

Conditions continue to be generally

satisfactory. The weather since last report has been showery and most of the districts in the province have been benefited thereby. Precipitations for May to date has ranged from half an inch in most of the districts to nearly two inches in the Grande Prairie and Peace River territory. In the south eastern district, there have been good local showers, but no general rains. Grass and winter rye are in need of rain, but other crops are looking well. There has been no further serious damage from soil drifting or from pests. Winter wheat has come through without loss.

In the south western district there has been some rain, and the grain crops have a good start, but dry conditions prevail generally and rain is needed over practically all of this section. Winter wheat is looking well and rye is headed out.

In the more central and northern territory precipitation has been somewhat heavier, and all crops are showing good growth. Damage from cutworms, wire worms and grasshoppers has been reported to a small extent in certain limited areas, but generally speaking there appears to be no further fear from this quarter of serious interference with the growth of the crop.

In the irrigated areas in the south the first crop of alfalfa is approaching the harvest period and is in excellent condition. Thinning of sugar beets has commenced. All irrigation operations are proceeding briskly.

Reports indicate that there will be considerable increase in grain acreage, particularly wheat in certain localities, but the general increase throughout the province is not expected to be great.

FOUR COMPETITIONS

ARRANGED BY DEPT. OF AGRICULTURE

Sponsored by the provincial government, organized efforts are being made to rid the province of a large number of crows, magpies and gophers. The government is offering cash prizes totalling \$2,500, while municipal districts and schools are also offering large prizes.

In some parts of the province there are offering free admission to anyone who presents two crows, or magpies, or a gopher tail. Crows, magpies and gophers are agricultural pests causing thousands of dollars loss to the farmers each year.

Four competitions have been arranged by the provincial authorities, all to end on Sept. 1. The first competition is open to gun clubs and game protective associations, with \$200 as the first prize. A total of \$600 in prizes is offered.

The second competition is open to any resident in the province, and cash prizes total \$800. Schools as a whole take part in competition three with total cash prizes of \$200, the first prize being \$70. Competition four is for school children, with prizes totalling \$900.

The competitions are operated on the points system. Two points are allowed for each crow's or magpie's foot, for each egg or other bird, two points, and one point for each gopher tail.

Further information may be received from the Game Commissioner, Department of Agriculture, Parliament Buildings Edmonton.

Capt. J. T. Shaw's

MANIFESTO

1. Immediate examination of our provincial taxation system and adjustment on sound principles of taxing powers between the province and the municipalities.
2. Decentralization as far as practicable in the services of government, so as to secure more efficient service at less cost.
3. An immediate and long overdue reduction in taxation with special tax adjustments for sub-humid areas not suitable to intensive production.
4. A serious and determined effort to make expenditure balance income every year, not every pre-election year only, as at present.
5. The budgeting of an adequate sum every year, on the sinking fund principle to effect the retirement of our public debt within a reasonable time.
6. Realizing the primary importance of the agricultural industry, the Liberal party pledges itself to assist that industry, in every reasonable way, by ensuring that co-operative marketing enterprises get a square deal, secure from unfair competition, and from all partisan influence and all discrimination; by the provision of adequate facilities for marketing the farmers' produce, by establishing in close co-operation with the Dominion government a system of rural credits based on some sound principles, by vigorous demand before the Railway Commission for needed reductions in railway and express rates and for the elimination of discriminatory freight rates, and jealously guarding the farmers' interests in the western route, not only by zealous watching but also by proper representation.
7. The Liberal party undertakes to inspire a real leadership in educational affairs and will be prepared to make more liberal financial provision for that essential service. Also will use every endeavor to have the federal government not only continue but increase its grants for technical education. In addition there must be a closer co-ordination of the agricultural work undertaken by the university and agricultural and other schools in the province.
8. The Liberal party pledges itself to encourage an expansion in the hospital and nursing service of the province in order to promote the highest standard of public health.
9. The Liberal party has assisted in every possible way to secure the return to the province of its natural resources. This should soon be realized if honored with public confidence. The Liberal party proposes to undertake the prompt and efficient development of these resources in the public interest along sound business lines.
10. When entrusted with office the Liberal party will engage a small body of experts to examine the sources of power in the province for the purpose of evolving if possible a practical power scheme to supply cheap power to our communities for industrial and agricultural purposes.
11. The Liberal party offers a redistribution according to a definite plan on the principle of representation by population paying however, due regard to the more sparsely settled portions, geographical area and community of interest; it being understood that such redistribution will substantially reduce the number of provincial ridings.
12. The Liberal party proposes to encourage a policy of co-operative effort of all classes and their representatives in the interests of democratic legislation.
13. The Liberal party strongly favors and approves of a co-operative effort between the Dominion and Provincial governments for the purpose of securing old age pensions. The plan which has received second reading in the House of Commons is approved.
14. The Liberal party is responsible for every advance made in securing to women a larger measure of equality in political and economic matters. That policy must be continued until in every practicable way women enjoy the fullest equality with men.
15. The Liberal party offers to the electors a policy of constructive effort of action, and a government 'of all the people, by all the people, for all the people.'

RES. 93

HAPPENINGS OF LOCAL INTEREST

BORN.—To Mr and Mrs G. Glass on Monday June 14th a daughter.

BORN.—To Mr and Mrs H. Gilbert of Edgerton on Sunday, a baby girl.

Mr L. T. Torson wife and daughter are spending a few weeks at the farm north of town.

Mr Wilson of Edmonton is visiting A. D. Wilson for a few weeks.

Mr W. J. Scott and Mr Gardner of Calgary were driving in from the East on the road near the fair grounds Wednesday evening failing to make the turn on to second ave. they ran the car into a cut bank throwing the occupants against the braces on the windshield cutting them severely about the head and bending the axle on a large Studebaker car which they were driving. They were detained in town language and raising a disturbance on several days until a new axle could be shipped from Edmonton.

Mr L. J. Killoran of Edgerton has rented the Cardell farm south of town and is moving there for the summer.

Your neighbors crop is insured against the hail storm. If yours is not you had better ring up Joe Welch right way and have this matter properly attended to before a hail storm comes this way.

Mr Owen who farms north of Fabyan has bought the Dr Little quarter south of town.

Mr Ray Norton of the Superior Lbr Co. Ltd. was in town last week having driven over from Vermilion.

Geologist King of The California Petroleum Co. a large established firm arrived in town last week with tents and other outfit and will study the field carefully before submitting his report.

Mrs Chas. Love of Camrose was in town last week looking after her property interests here.

Mr and Mrs Goulet were visiting in Edmonton last week.

Mrs Simmons, Hazel Brunner and Beth Elder left for the coast Saturday night.

***If you want to be sure to sell your farm property, house, and lot, or OIL RIGHTS, see The Wainwright Locators, J. Stuart, mng'r.

Mr Sidney Nelson has successfully completed his course at the Camrose Normal and is at home for the vacation to teach.

Mr Geo. Skett and Mrs Petrie returned home last week as their mother is improving.

Mr Chas. Beatty is quarantined for scarlet fever.

The British Wainwright Oil and Development Co. of Winnipeg ordered a carload of derrick timbers from the Atlas Lumber Co. last week and will be erecting a derrick shortly.

Mr Roy Hartling has rented the Fieldhouse house on Queen street and is moving here from the Calgary Oil Field where he has been working.

The Buffalo Park are preparing to start shipping a large number of buffalo north as they did last year. There is a possibility that they will also have to slaughter a number this fall to reduce the herd.

You will never be sorry if you insure your crop against Hail. If a storm comes along and destroys your crop you will be highly pleased with the liberal adjustment and quick service you will get from Joe Welch. Your check will be in your hands in five days from the adjustment.

Mr R. Caslick who bought the Geo. Thompson place has made arrangements with the Gov't. to take it into the Park reserve and will start out soon to hunt for another quarter of Gov't. land to exchange for it. He is having a sale at his farm to sell all his farming implements.

Mr Gordon Graham has rented the office formerly used by the Atlas Lumber Co. to use as a returning office during election.

Mr Wm. McKay has added a verandah and built a fence around the house occupied by druggist Adams on 5th avenue.

Fire Chief Richardson reports that the recommendations contained in last week's issue, regarding chimneys to be built, have been complied with by the owners.

Mr W. T. Suckling and Edgar Turner are covering this territory introducing the books which they handle.

Several hail storms have visited this district in the past three years and will come again. It is good business to add 60c per acre to the cost of your crop and be sure that you will get your returns from it. If the hail hits it. It only takes five minutes to destroy it. Joe Welch will insure it and give you a quick and liberal adjustment if you have a loss insure with a man that has paid out thousands of dollars in hail losses to farmers of this district. Joe Welch phone 57.

Wm McCausland appeared before a Magistrate Lally on Tuesday morning to answer to a charge of using abusive language and raising a disturbance on several days until a new axle could be shipped from Edmonton.

All petitions asking for a Municipal hospital at Wainwright are now in the hands of the Government and it is now up to the Department.

Stirling Tory is erecting a new up to the minute home on Main street north.

Mrs Dr Broad of Edmonton was a visitor in town last week.

Mr W. Hayes of Edgerton sang at the political meeting in the Elite Theatre last Thursday to the delight of a large audience.

Superintendent Smith of the Buffalo Park is now driving a new Landau Sedan.

Quite an improvement is being made at the Billings Bakery this week. The interior is being replastered and put in a real sanitary condition.

Mr H. Y. Pawling left for the city on Monday evening. During his absence the town office will be closed. Mr Pawling expects to return on Thursday.

Your post needs will be well attended to at the Atlas Yard as they have a large stock of green Tamarae Split Cedar on hand. Also Cast Sag Gates with your name painted on if you wish. A big stock of dry lumber always on hand for your selection and convenience. Plan books and estimates furnished free. If you want a building this summer come in as we can arrange terms for a limited number until fall.

To Apply THE PAINT

Dust, soot, heat, cold and moisture—all contribute their share toward "sapping the life" out of the best woodwork, whether interior or exterior. And only the highest grade Paints and Varnishes will thwart those elements.

Have the Brush work done by hands that know their business. They're ours! May we estimate on your new home needs?

H. COFIELD

Painter, Paperhanger and Decorator.
